

Mission and Vision

Mission

The mission of PAC³ is to reduce the human and economic burden of cancer for all citizens of the Commonwealth by:

- ◆ Providing a forum for collaborative action
- ◆ Identifying and disseminating best practices
- ◆ Reducing cancer-related health disparities

Vision

It is the vision of PAC³ that, by working together in partnership across the continuum of cancer control, we will have a significant impact on improving the health of the citizens of the Commonwealth.

Together, we will ensure that research-based knowledge and understanding of the causes of cancer and its progression will allow us to develop and implement state-of-the-art prevention, early detection, treatment, and quality of life programs that are evidence-based and deliver high-quality care to all citizens of Pennsylvania.

Pennsylvania Cancer Control Consortium

*Individuals and organizations
working together to reduce the
burden of cancer for all
Pennsylvanians*

Who We Are

The Pennsylvania Cancer Control Consortium (PAC³) is a statewide network of individuals and organizations representing public, private, and voluntary sectors. PAC³ members share the common desire to work together to reduce the burden of cancer in Pennsylvania.

People across the state are joining together to achieve more than they could independently. Implementing Pennsylvania's Comprehensive Cancer Control Plan requires the work of many individuals to collaboratively achieve unique advances in comprehensive cancer care that would not otherwise happen in Pennsylvania.

PAC³ will make a difference, for when many minds, hands, and hearts join together in a unified effort, great things can *and will* occur.

Together...we can make our vision of eliminating cancer a reality.

What We Do

By working together in partnership, we can have a significant impact on improving the health of Pennsylvanians and reducing death and suffering from cancer. PAC³ provides information and opportunities for individuals and organizations to collaborate in comprehensive cancer control efforts.

Implementation Action Committees

Volunteer members provide expertise and leadership to develop strategies and activities designed to accomplish PAC³ priorities. These Committees include:

- ◆ Strategic Initiative Committee(s)
- ◆ Education/Advocacy Committee
- ◆ Collaborative Activity Committees

Sponsored Projects

Ongoing projects provide key opportunities to advance cancer control activities statewide. These projects currently include:

- ◆ PAC³ Cancer Resource Database
- ◆ BE A BRIDGE Partnership Project

Networking Opportunities

PAC³ promotes networking and collaboration through member work sessions and other events. In addition, PAC³ provides an information center on its website where a calendar of events around the state and a compilation of ongoing cancer-related programs and resources are available.

Why Become Involved?

Significant impact through collaboration cannot happen without the participation and support of many individuals and organizations across many sectors.

In addition to becoming involved in PAC³ activities, your financial support as a PAC³ Partner is critical.

PAC³ Partnership provides many benefits, including:

- ◆ Promotion of your organization's efforts, news, events, materials and programs through the PAC³ website, weekly e-newsletter, and other communication tools
- ◆ Opportunities to build collaborations with other individuals and organizations for PAC³ or other initiatives
- ◆ Access to valuable networking and participation opportunities, including PAC³-sponsored activities
- ◆ Leadership opportunities to prioritize PAC³ activities and develop strategic initiatives statewide
- ◆ Full informational access to programs and resources in the PA Cancer Resource Database

For more information about becoming a PAC³ Partner, please call us at 412-623-0033.
