Connecting Communities: Reaching Those In Need

SYMPOSIUM OBJECTIVES

- To provide a venue to uncover and combine all our wisdom and release our collective energy
- To increase the competencies and enrich the work experience of scientific investigators, community-based advocates, public health professionals, and others through skill building
- To increase information about and general awareness of cancer and cancer health disparity issues and how they are affected by local and national factors
- To provide private and public organizations community resources that will focus on finding new partnership opportunities, as well as enhance their health disparity objectives
